## **PAPAKAINGA LAND and the current review of the Marlborough District Council (MDC) Resource Management Plan**

The Marlborough District Council has advised that there is an opportunity for iwi members (hapū and whānau) at this late stage before the Proposed Plan is publicly advertised, to provide specific information to the Council about land owned by iwi members that is proposed to be developed for papakainga purposes within the next 15 years. The Trust's Waikawa office can act as a point of connection between interested iwi members and the Council.

If the information is made available within the next two weeks, it may be possible that the information could be included in the Proposed Plan. Once the Proposed Plan is publicly notified, the Trust then can submit this information as part of its own formal involvement with the Proposed Plan. If you require further information, you are welcome to contact Ian Shapcott at the Trust's office:
